

## Reason for Recognition: Excellence

To: Darshan A

The way you have approached the purge story and have been on top of it is commendable. The way you went extra step to automate the test cases on your own to demo me all the scenarios and not waiting for the testing team to do it for you. Its so refreshing to see a developer go an extra step to make sure the work he/she is doing satisfies all tech and business scenarios.

All I can say is well done and others should take inspiration from you.
